

SOP-PV-MRD-019 - Regulatory Watch and Signal Detection

Meridian Labs - Pharmacovigilance

Reference	SOP-PV-MRD-019	Version	V2
Type	Standard Operating Procedure	Mise en activite	2025-03-25
Entite	Meridian Labs - Pharmacovigilance	Redacteur	Dr Helene Marchetti
Statut	En activite	Approbateur	Marc Villeneuve

1. Purpose

This standard operating procedure describes the regulatory watch and signal detection activities performed by the Meridian Labs pharmacovigilance team.

2. Sources monitored

- regulatory authority bulletins and safety communications;
- scientific literature relevant to the therapeutic areas covered;
- the internal case database maintained under PR-PV-MRD-002;
- aggregate reports received from partner organisations.

3. Signal detection frequency

Source	Review frequency	Owner
Regulatory bulletins	Weekly	Pharmacovigilance team
Internal case database	Monthly	Pharmacovigilance team
Scientific literature	Monthly	Dr Helene Marchetti

4. Signal evaluation and escalation

Any potential signal is evaluated within 5 working days of detection. A confirmed signal is escalated to the competent authority following the transmission timelines defined in PR-PV-MRD-002.

5. Reporting to management

A summary of regulatory watch activity and any confirmed signal is presented at the management review described in PR-QA-MRD-011.

6. Related documents

- PR-QA-MRD-011 - Revue de direction

Historique des revisions

Version	Date	Objet de la revision
V2	2025-03-25	Signal evaluation window shortened from 10 to 5 working days
V1	2023-08-01	Initial release

Document fictif genere pour une demonstration technique. Meridian Labs est une organisation imaginaire ; toute ressemblance avec une organisation reelle serait fortuite.
